WEEK FEVERISHLY Sales Amount to Nearly 800,-000 Shares in Half-Day

WALL STREET ENDS

"WAR BRIDES" ARE NOT CONSPICUOUS IN TRADING

Session.

Interest Centers Largely Around the Railroad Issues, Which Show Consistent Gains.

NEW YORK, September 16 .- The week in the stock market terminated in much the same way that it opened-a ferment of speculation—sales in the two-hour session amounting to nearly 200,000 shares, equivalent to a full day of 2,000,000.

character of the operations, however, interest converging almost entirely about the railway division, in which extreme gains of 1 to almost 3 points were fairly numerous. Except for United States Steel, which continued its upward career to the new record of 108 industrials, equipments and munitions were in comparatively light demand although Driggs-Seabury gained an ad-

A distinctly irregular undertone was denoted by the favorites of the early week and it was suggested that the upward movement in investment issues was being used as a cloak to unload the more mercurial stocks.

Specialties Make Gains.

There were moderate reversals in Mercantile Marines, American Smelting the Mexicans, Studebaker and Baldwin Locomotive, but Maxwell rose 31/2 points. Reading was the only important railway issue to hang back, but that stock had a smart gain earlier in the week, when it made its new record. Aside from industrial conditions as indicated by the threatened expansion of labor troubles, week-end news was mostly favorable, the mercantile agen-cies reporting an increase in distribu-tion of merchandise and large advance sales.

sales.

The bank statement came up to general expectation, with a substantial gain in cash and an increase of slightly more than \$19,000,000 in excess reserves, that item, however, being very much under the total of a month ago.

The only feature to the bond market, which ruled from irregular to firm, was the greater diversification of offerings. Today's total sales (par value) were \$3,420,000. United States coupon 4s were \$4,000.

Week of Big Trading.

The extent of the week's feverish spec lation may be judged from the fact that operations, including today's two-hou on, amounted to not less than 7,500, 000 shares. This is exclusive of man transactions in odd lots which are no reported by the stock tickers.

reported by the stock tickers.

Public or outside interest was the largest and most extensive in years, this being evidenced by the activity in the offices of commission houses and by the countless orders received by telegraph and telephone. The advance was far more impressive than last year's meteoric movements, which were mainly confined to the so-called "war brides."

This week's business included issues of that character, but to a comparatively limited degree. In no important instance did the war shares come within halling distance of last year's meximums. Steel was the leader, its overturn for the week, at the new record of 105, amounting to fully 1,100,090 shares.

Unprecedented Steel Prosperity.

Allied industrials were equally strong, presumably on the known state of the steel industry, which is proceeding at a point of unprecedented prosperity. This was demonstrated by the new or increased dividends declared by these issues, including Lackawanna Steel

Steel.

Coppers and metals in general were active and higher, their advance being accelerated by the statements of the American Smelting and Refining Company and similar concerns, which reported enormous gains in earnings. Equipment shares followed the lead of industrials, but munitions and motors were under pressure, although General Motors overshadowed all other stocks on its rise of 178 points to 759.

New records also were made by rails, Reading rising to 114½, while Union Pacific touched 148¼, its top price since 1914, in the brisk and general advance which featured the week's final dealings.

There was a better inquiry for bender

ings.

There was a better inquiry for bonds and other investment issues at direct sale, but the movement failed to reflect the extraordinary dealings on the ex-

CHICAGO GRAIN.

CHICAGO, September 16.—Uneasiness in regard to British trade restrictions did a good desi today to increase the selling pressure on wheat. Largely in consequence the market closed unsettled, 1% to 2% net lower, with December at 1.47% to 1.47%, and May at 1.48a 1.48%. Corn lost %2% to %, and oats %2% to %, and oats %2% rovisions finished irregular, ranging from 47 decline to a rise of 1.50.

rise of 15.

Conflicting opinions were put forth as to whether the latest London trade regulations concerning neutrals had seferences to wheat. The uncertainty resulting counted decidedly in favor of the bears, especially as foreign markets had failed to respond to yesterday's upturn in prices here. Continuance of the millers strike in Great Britain tended also to handicap the bulls. About the only important rally which took place seemed to be caused chiefly by word of a big Teutonic victory in Rumania near the Black sea. The rally, however, did not at best come near to offsetting the previous break in values and was not a strong demand for greasy to combing, and Queensland sold 13-4. Greasy crossbreds were but scoureds were neglected.

NEGRO IS CUT IN NECK IN LUNCHROOM F also Teutonic victory in Rumania near the Black sea. The rally, however, did not at best come near to offsetting the previous break in values and was not a strong demand for greasy to combing, and Queensland sold 13-4.

SUGAR MARKET.

NEW YORK, September 18.—The market for sugar futures was quieter to-day, and operations were principally of an evening-up character, but the undertone was steady as Cuban interests seemed to be on the buying side. Closing quotations were one point lower on November, and unchanged to three points higher for other positions. December sold from 4.24 to 4.25, closing 4.23: March, 3.92; closing 3.92; May closed 3.98, and July, 4.04. Raw and refined sugar holiday.

Colored man named John Williams, who is alleged to have done the cutting.

Purvis was taken to Casualty Hospital, where he was given an injection of salt solution. It was feared he would die from loss of blood before the hospital was reached He did not die, however, and the salt solution had the effect of reviving him. At an early hour this morning, it was said, he seemed a trifle better, although his condition was renominated by the republican district convention joday.

DRY GOODS MARKET.

NEW YORK, September 16.—Jobbers of dry goods today did a very large business for fall and spring. Cotton goods were higher and yarms were firm. Linens were bought for next year's delivery. Knit goods ruled very firm. Wool goods were steady with a rising tendency.

LONDON WOOL AUCTION.

IN LUNCHROOM FIGHT

Alonzo Purvis in Serious Condition in Casualty Hospital and Police

the Black sea. The rally, however, did not at best come near to offsetting the previous break in values and was not well maintained.

Lack of any aggressive support bewheat pit as the session drew to a close. What demand there was came chiefly from shorts taking profits. On the other hand, many weak holders displayed notable anxiety to be relieved of the burden of carrying open risks over until Monday.

Corn weakened with wheat. Besides, it was said frost predictions had not been fulfilled to the extent which had been looked for, and that in any case not more than 15 per cent of the crop could be hurt. For the most part transactions in oats appeared to be of a local character. Export business was hindered by a lack of cars.

Although provisions made a firm start in sympathy with higher prices on hogs, the market afterward eased off influenced by the weakness of grain. Lard prices were upheld by liberal purchasing, that was ascribed to a leading packer.

In Casualty Hospital and Police

Are Hunting John Williams.

Suffering from an incised wound in the left side of his throat and extremely weak from loss of blood, J. Alonzo of this country die; and before reaching the age of fifty-five, twenty out of every hundred are dead.

YOUR MONEY AT WORK

Five Strong Enemies of Thrift.

.\$11,310,000

BY JOHN M. OSKISON.

Expert students of thrift say that these are the five great enemies to the constant well being of the average family:

1. Accidents-A certain western life insurance company reports that in the ten years of its existence 25 per cent of the deaths among its policy holders have re-2. Sickness-Again quoting the same

company's report, 22 per cent of the deaths for which claims were paid resulted from tuberculosis, typhoid and diseases of the heart. For each death due to these sloknesses it is fair to say that three victims either wholly or partially recovered after a more or less prolonged period of disability. In such periods of illness, the money-earning power of the victims was gone and the family incurred heavy additional expenses.

3. Permanent Total Disability—it is almost the rule in an American family that one member is an invalid—conomically a

most the rule in an American family that one member is an invalid—economically a burden, to be carried until death renders the last bill.

4. Old Age—After the average man or woman passes the age of sixty his or her earning power (either as an actual money-getter or as a valuable worker in the home) is practically lost. The man becomes a pensioner upon the reasurces of the family (unless he happens to be one of the tiny minority who have worked for pension-paying corporations). The woman ends her days in the shelter of her children's homes—a sort of wandering mendicant.

5. Death—Hefore reaching the age of

UNDER THE U. S. FLAG.

Over 700 Vessels Added to Foreign Trade Fleet in Two Years.

More than 700 vessels have been add ed to the fleets flying the American flag in foreign trade in the two years end ing June 30, 1916. The Department of Commerce nounced last night that in June, 1914.

there were 2,405 such vessels of 1,076,ment more than \$300,000 on account of 152 gross tonnage, and two years later there were 3,135 ships of 2,194,470 gross tonnage. Nearly half the tonnage, 1,674,679, in 320 vessels, halls from New York city.
